

# USING DOUBLES AND NEAR DOUBLES TO SUBTRACT

Name:

Date:

Use rods and number lines to answer these questions. Below is an example.

**Example:**

$$18 - 4 =$$

8 takeaway 4 is 4, so 18 takeaway 4 must be 14. I can show this using base-10 equipment and on a number line. I can record it as an equation.

$$18 - 4 = 14$$

$12 - 1 =$	$17 - 4 =$	$15 - 2 =$
$17 - 3 =$	$13 - 2 =$	$13 - \_ = 11$
$\_ - 4 = 14$	$18 - 4 =$	$13 - 1 =$
$15 - \_ = 13$	$12 - \_ = 11$	$19 - 5 =$
$19 - 4 =$	$\_ - 4 = 15$	$17 - \_ = 14$
$14 - 2 =$	$15 - 3 =$	$16 - 3 =$
$\_ - 5 = 14$	$13 - \_ = 12$	
$17 - \_ = 13$	$\_ - 2 = 12$
