

LEARN DOUBLES TO 20

Use these cards to explore doubles from 12 to 20.

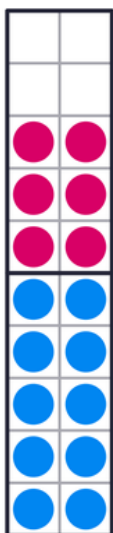

- Cut out the cards, fold them and glue them.
- Look at the number frame and say the double it shows, and the associated subtraction fact.
- If you're right, remove the card; if not, keep practising until you're confident.
- Alternatively, look at the number facts and draw or describe the number frame.

$$6 + 6 = 12$$
$$12 - 6 = 6$$

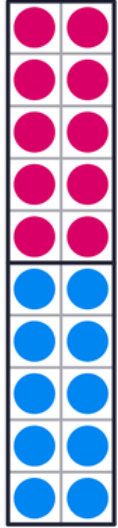

$$7 + 7 = 14$$
$$14 - 7 = 7$$

$$8 + 8 = 16$$
$$16 - 8 = 8$$

$$9 + 9 = 18$$
$$18 - 9 = 9$$

$$10 + 10 = 20$$

$$20 - 10 = 10$$
